3RD EDITION

# The Economics of Tourism Destinations

Theory and Practice

**Norbert Vanhove**, Katholieke Universiteit Leuven, Belgium

The measurement of tourism, for example analysing competitiveness and evaluating tourism projects, is not an easy task. Now in its third edition, *The Economics of Tourism Destinations - Theory and practice* provides a succinct guide to the economic aspects of tourism for students and practitioners alike to decipher the methods of measurement of supply, demand, trends and impacts. Each chapter combines theory and practice and is integrated with international case studies. Combining macro and micro aspects of economics to the tourism destination, this is an invaluable resource for students learning about this subject and it is also aimed at tourism researchers and policy makers.
